

Crush Loop

Turning waste into stuffy goods

“Small acts, when multiplied by millions of people, can transform the world. Start by going green.”

-Howard Zinn

REDUCE, REUSE, RECYCLE, REPAIR

OUR INSPIRATION

FOUNDER ZEE BAGS
ZYMAL UMER

Zymal Umer, one of Pakistan's youngest social entrepreneurs, inspired me deeply with her passion for sustainability. She began her journey at just 9 years old, creating eco-friendly paper bags under the brand Zymal Eco-Friendly Bags, proving that age is no barrier to making a difference.

Her commitment to turning waste into something purposeful sparked my own idea: repurposing sanitized cotton from discarded cigarette butts to create eco-friendly stuffed toys. Like Zymal, I believe even the smallest efforts can lead to big environmental change —and my business is built on that belief.

The problem

4.5 trillion cigarette butts discarded yearly —world's most littered item (WHO, 2019; NatGeo, 2019) Containing cellulose acetate plastic that takes up to 10 years to decompose releasing leach arsenic, lead & nicotine into the ecosystem while coming across as armful to marine life, soil, and water quality as well as adds to urban visual and microplastic pollution

Innovation in sustainable materials

What do we do?

We collect cotton from discarded cigarette butts, clean and repurpose it as eco-friendly stuffing for stuffed toys. These toys are lovingly donated or reused after washing —with plans to launch a new line of sustainable toys soon.

Visual Representation

What we think

Mission statement

To transform cigarette waste into safe, sustainable, and meaningful products by creating eco-friendly stuffed toys that bring joy, promote reuse, and reduce environmental harm.

Vision statement

A world where waste is reimaged as a resource, and every child holds a toy that's not just cuddly—but kind to the planet.

How do we do it?

Step 1: Collect & Clean

Discarded cigarette butts are gathered and thoroughly sanitized to extract safe, usable cotton.

Step 2: Process & Prepare

The cleaned cotton is processed into soft stuffing material suitable for toys.

Step 3 : Create & Share

Eco-friendly stuffed toys are crafted, then donated, reused, or prepared for sale in new collections.

Create with us

How much does it cost?

Estimated Cost per Toy: P K R 550–650 (Based on 500 butts =2 toys)

Component	Total (for 2 Toys)	Cost per Toy
Cleaning Supplies	P K R 240	P K R 120
Labour	P K R 320	P K R 160
Synthetic filling	P K R 220	P K R 110
Fabric and Stiching	P K R 240	P K R 120
Eco Packaging	P K R 120	P K R 60

Cost Breakdown Per Toy (PKR)

Total Initial Capital Requirement
(10,000 Units)

Category	P K R
Machinery & Equipment	P K R 200,000
Raw Materials	P K R 180,000
Marketing & Branding	P K R 150,000
Labor Costs	P K R 125,000
Workspace Setup	P K R 55,000
Miscellaneous	P K R 20,000
Total Initial Capital	P K R 730,000

Initial Capital Requirement Breakdown (PKR 730,000)

We're starting with a total setup budget of PKR 730,000. Most of it will go into machines and raw materials to kick off production smoothly. We're also setting aside a good chunk for marketing and branding, because making noise in the market matters! Some funds are planned for hiring help, setting up the workspace, and a little for unexpected expenses. It's a balanced budget that helps us hit the ground running.

Mass Production Cost (10,000 Units)		
Component	Total (10,000 toys)	Per toy
Cleaning supplies	P K R 200,000	P K R 30
Labor	P K R 1,250,000	P K R 125
Synthetic Filling	P K R 1,000,000	P K R 100
Fabric & Stitching	P K R 850,000	P K R 80
Eco-Packaging	P K R 650,000	P K R 60
TOTAL(Mass production)	P K R 3,950,000	395

Mass Production Visual (Monthly)

Y-axis: Cost per Toy (PKR)

X-axis: Production Stage

Bar 1: Prototype Stage – PKR 550–650

Bar 2: Mass Production – PKR 395

📉 The visual should clearly show the drop in per-unit cost from the prototype phase to mass production, highlighting efficiency and cost savings.

◆ **Estimated Cost per Toy:** PKR 395–400

◆ **Selling Price per Toy:** PKR 1,000–1,200

Monthly Operational Expenses (10,000 units)			
Category		PKR	
Raw Materials (monthly)		PKR 115,000	
Labor Costs (monthly)		PKR 80,000	
Marketing & Distribution		PKR 80,000	
Utilities & Rent		PKR 15,000	
Miscellaneous Expenses		PKR 10,000	
Total Monthly Expenses		PKR 300,000	
Workspace Setup Category		PKR	
Rent (for 3 months)		PKR 45,000	
Utilities (Electricity, Water, Internet)		PKR 10,000	
Total Workspace Setup		PKR 55,000	

Miscellaneous Expenses	
Category	PKR
Office Supplies, Transport, Unforeseen Costs	PKR 20,000
Utilities (Electricity, Water, Internet)	PKR 10,000
Total Miscellaneous	PKR 30,000

Breakeven Analysis (Monthly)

Our breakeven point is 547 toys per month.

This means we need to sell at least **547 units every month** to cover all fixed and variable costs.

After that, every toy sold contributes directly to profit.

Fixed Monthly Costs:

PKR 385,833

Selling Price per Toy:

PKR 1,100

Variable Cost per Toy:

PKR 395

Through selling **1,000 toys per month**, crush loops can expect a **monthly profit of PKR 319,167**.

Profitability Analysis (Monthly)

Category	PKR
Revenue (1,000 toys * PKR 1,100)	PKR 1,100,000
Variable Costs (1,000 toys * PKR 395)	PKR 395,000
Fixed Costs (Monthly)	PKR 385,833
Profit per Month	PKR 319,167

Our Business Model

Input:

Free, waste-based raw materials
(cotton from cigarette butts)

Output:

Adorable, eco-conscious soft toys
with a powerful sustainability story

Revenue Streams:

- Online eco-stores & Instagram sales
- NGO & school awareness kits
- Corporate gifting (CSR-focused)

Production Model:

Empowering artisans & waste workers
through partnerships

Scalability:

Community-driven expansion via
clean-up drives & workshops

Target Market

Urban Gen-Z & Millennials
Eco-savvy trendsetters

Parents
